

CLAIMS

1. A sealant for automobile doors, for use in the bonding of an inside screen to the inner panel of an automobile door, said sealant comprising partially crosslinked butadiene-acrylonitrile rubber (NBR) and/or butadiene-styrene rubber (SBR), a plasticizer and a filler.
2. The sealant of claim 1, wherein the total content of the partially crosslinked NBR and/or SBR is 5 to 45% by weight.
